

ChaosAI

The AI Agent That Does the
Pentest Grunt Work

For Freelance Pentesters & Cloud-First SMBs

SEPTEMBER 2026

A Freelance Pentester Spends 3 of Every 4 Hours Not Hacking.

Manual recon. Tool noise. Report writing.
That is what AI should own.

AVG. ENGAGEMENT BREAKDOWN

 **40+ hours per engagement**
Most of it grunt work, not expertise

 **2 to 3 clients / month max**
Overhead caps income, not skill

 **More clients means burnout**
Not more income

vs

✗ WITHOUT CHAOSAI

 **Manual Recon**
Nmap, Subfinder, Amass run by hand. Hours per target.

 **Scanner Noise**
Hundreds of alerts, most are false positives to triage.

 **PDF Report Writing**
Half a day drafting the same structure every time.

 **40+ hours per engagement**

✓ WITH CHAOSAI

 **AI Runs Recon**
Agents map the full attack surface automatically overnight.

 **Only Proven Findings**
AI chains and validates every path. Zero false positives.

 **Report Auto-Generated**
White-label client PDF ready to send. No copy-paste.

 **Under 4 hours per engagement**

Scanners See Bugs. Attackers See Chains.

No existing tool connects recon findings into a proven exploit path. That is the gap ChaosAI fills.

LEGACY OPTION A

APPROACH
Manual Pentest

- ✓ **High Accuracy**
Human intuition finds complex logic bugs
- ✗ **Infrequent (1-2x / Year)**
Leaves massive time gaps for attackers
- ✗ **Expensive and Unscalable**
€15K+ per test, linear headcount scaling

OUR SOLUTION
**Attack-Path
Validation**

- 🔗 **Chained Exploit Proof**
Recon, misconfig, privilege escalation proven as one real path
- 🎯 **Zero False-Positive Noise**
Every finding validated before it surfaces, no manual triage
- 🔧 **Auto-Fix GitHub PRs**
Generates the patch, opens the PR, discovery to remediation

LEGACY OPTION B

APPROACH
Auto Scanners

- ✓ **High Frequency**
Runs daily or on every commit
- ✗ **High Noise (False Positives)**
Manual triage of thousands of alerts
- ✗ **No Context, No Chains**
Sees bugs in isolation, never the attack path

THE GAP: Scanners miss attack chains. Human experts can't scale. **ChaosAI's AI agents do both.**

From Attack Path Discovery to Automated Remediation

Prove the exploit chain. Generate the fix. Ship the PR.

Graph-Based Attack Chains

Multi-agent LangGraph architecture chains recon findings into real exploit paths: Subdomain → Exposed Key → Privilege Escalation - proven, not hypothetical.

Validated, Zero-Noise Findings

AI agents attempt benign exploitation at every step. A finding only surfaces when the full chain is proven - no false-positive triage, ever.

Auto-Fix via GitHub PR **KEY DIFFERENTIATOR**

For every validated finding, ChaosAI generates the exact patch code and opens a GitHub Pull Request. Remediation is one merge away.

100%

FINDINGS VALIDATED

Auto-PR

FIX GENERATION

How It Works

Three autonomous steps. One proven attack chain. One GitHub PR.

RECONNAISSANCE

Map the Attack Surface

Autonomous agents continuously enumerate domains, subdomains, cloud assets, and APIs - building a live graph of every entry point as your infrastructure evolves.

CHAIN VALIDATION

Prove the Attack Path

AI agents chain individual findings into real exploit sequences - Subdomain → Exposed Key → Privilege Escalation. Only fully-proven paths surface, eliminating 99% of false positives.

AUTOMATED REMEDIATION

Fix & Ship the PR

For every proven attack path, ChaosAI generates the exact patch code and opens a GitHub Pull Request. Delivers white-label PDF reports for compliance or client handoff.

● Live Asset Graph

● Chain Validation Loop

● Proven Path → Auto PR

The Underserved Market

Freelance pentesters, solo consultants, and SMBs that can't afford traditional security.

TAM
€200B+
Global Cybersecurity

SAM
€3B+
Pentesting Market

SOM
€500M+
Freelancers, SMBs & Cloud-First Startups

MACRO TREND

Cybersecurity spend is resilient to downturns.

OUR WEDGE

Freelance pentesters and SMBs who need security but can't afford €15K+ engagements.

MARKET GROWTH

15.2% CAGR
2024-2030

KEY DRIVERS

SMB cloud adoption • Freelancer growth • Compliance pressure

Value-Based Pricing

Priced on value delivered, not seat count - sustainable margins at every tier.

Pay-As-You-Go

€99 / scan

No subscription, no commitment

- ✓ 1 Target Scan per purchase
- ✓ Automated Recon & Chain Validation
- ✓ White-Label PDF Client Report
- ✓ Zero setup - scan in minutes

Target: Freelance Pentesters

MOST POPULAR

Agency / Pro

€299 / month

Security agencies & dev teams

- ✓ Up to 5 Active Targets / month
- ✓ Multi-Tenant Dashboard
- ✓ GitHub Auto-PR Fix Generation
- ✓ White-Label Client Reports
- ✓ API Access

Target: Agencies & Dev Teams

Compliance Pack

€2,500 / year+

Growing orgs & compliance-driven SMBs

- ✓ Up to 15 Target Assets
- ✓ Continuous Background Monitoring
- ✓ SOC 2 / ISO 27001 Evidence Mapping
- ✓ GitHub Auto-PR Fix Generation
- ✓ Priority Support

Target: Growing Orgs / SMBs

TRACTION

€50K Pre-Seed Round

Focused capital to reach first revenue and validate unit economics in 6 months.

6-Month Execution Roadmap

ON TRACK

MONTH 1

Production Ready

Ship and Charge

Harden platform, ship self-serve PAYG onboarding, and close first 5 paying customers from the existing design partner pipeline.

MONTH 3

20 Users / ~€5K MRR

First Revenue Milestone

20 paying users across PAYG and Agency/Pro tiers. GitHub PR integration live. White-label reports shipped.

MONTH 6

50 Users / €25K ARR SEED READY

Unit Economics Proven

50 paying users. Retention and conversion rates proven. Strong enough metrics to raise a full seed round with confidence.

Technical Founder, Full-Stack Vision

Building the tool I needed when I was on the other side.

Shubham Rao

Founder & CEO

EY · AWS · Irish Gov

AWS SA · MS SOC · Sec+

AWS Gen AI Pro

Cloud and AI engineer with experience building and securing large-scale infrastructure on AWS for enterprise clients. Previously held senior cloud engineering roles at EY and Irish Government, scaling systems for millions of users.

The idea for ChaosAI came from working at Irish Water, where critical infrastructure teams relied on infrequent, expensive pentests while their attack surface evolved daily.

CORE EXPERTISE

 Cloud Infra

 LLMs & AI Agents

 SecOps

 Python

Why I Can Execute

The right background at the right time.

Founder-Market Fit

I've been the engineer scrambling after a pentest report drops. At Irish Water, I saw the gap between what security teams need and what they actually get. ChaosAI addresses that directly.

AI-Native, Not AI-Wrapped

Built the engine from recon to fix generation, and it's already being tested with real companies across three countries.

Proven Execution Velocity

From concept to working product to technical validation with engineers at TCS and Mediolanum. Shipping daily based on real feedback.

The Future of ChaosAI: The Virtual Security Engineer

For every company that can't afford a security team.

Offense

CURRENT

Automating the attacker's perspective for the most accurate risk data.

 Autonomous Pentesting

 Exploit Chain Validation

 Auto-Fix GitHub PRs

STATUS

TIMELINE

Q3-Q4 2026

Defense

2027+

Offensive data trains defensive agents to autonomously patch vulnerabilities.

 Blue Teaming Agents

 Auto-Remediation

 Continuous Hardening

TIMELINE

2027+

The Long-Term Vision

Become the virtual security engineer for every company that doesn't have one.

MARKET OPPORTUNITY

Join Our Journey

WE ARE RAISING

€50K

Pre-Seed / Angel Round

First Revenue Sprint

Runway to ship production, close first 50 paying users, and prove unit economics in 6 months

OUR VISION

"To become the virtual security engineer for every company that can't afford one, making continuous security testing accessible to SMBs and freelancers worldwide."

LET'S BUILD TOGETHER

✉ director@entropyresearch.ai

🌐 www.chaosai.dev

Focused capital to prove unit economics and reach seed-raise-ready metrics.

📖 The Plan (6 Months)

Product

Ship production platform with PAYG flow and GitHub PR integration

Customers

50 paying users across freelancer and Agency/Pro tiers

Revenue

€25K ARR with proven retention and conversion at each price point

Milestone

Metrics strong enough to raise a full seed round with conviction

★ Why Invest Now

Founder-Market Fit

Deep experience in Cloud, AI, and Security from EY, AWS, and Irish Government.

Validated Pipeline & Ecosystem Backing

Active conversations with Mediolanum, Gorilla Capital, and Irish Water. Google Cloud \$25K grant, DPIIT recognised, IPV IdeaSchool Top 40.

Massive Underserved Market

90% of SMBs can't afford a pentest. Freelancers waste 80% of time on recon and reports. Both need this tool.

Massive Upside

Defensible niche with clear expansion path. Start with freelancers and SMBs, grow into the full security platform.
